THEDA BARA TURNS INTO IRISH COLLEEN

Foremost of Theatre Vamps of Yesteryear Makes Her Debut

as Simple Maid.

William Fox Produces Two Elaborate Sets of Fine Movie Pictures.

Where are the vamps of yesteryear The question sweeps through the picture theatre with the shrill tragedy of the banshee's wall. Certainly the rag and the bone and the hank of hair have de-parted from the screen of Broadway. is she banished to such humble temples "The Bijou Dream" or is she interred in some Staten Island nickleodeon? She not accessible now to the ordinary pensed by the cinema.

Penned by the cinema.

Some information on this point was obtainable last night when William Fox displayed two elaborate sets of pictures at the Forty-Fourth Street Theatre. In "Kathleen Mayourneen," Theda Bara as a simple Irish colleen. A lawn kerchief and an expression that could have been gained only by the ceaseless repet-tion of "prunes and prisms" showed that at least one of her school had reformed. Just as ladies who have changed their way of life for the better whether it be in performances, dramatic or operatic, accentuate the difference by drawing down the corners of their mouths and looking rather martyred by the world, so did Miss Bara to prove that she had parted permanently with

her well known past.

But it was the pictures to illustrate "Evangeline" that formed the most interesting part of the programme. They are a picturesque and beautiful illustration of Longfellow's poem, varied and at times a trifle redundant, just as all such cinemas are. There was even a stirring fight with redskins on the plains that did not appear to antedate William S. Hart. But the general effect com-bined beauty and interest absorbingly. Mirlam Cooper was a pretty model Evangeline, at her best moreover when the audience saw her full face. Ther was the accompaniment of an admirable orchestra to the numerous views.

A DISCOVERY THAT BENEFITS MANKIND

Two discoveries have added greatly to human welfare. In 1835 Newton originated the vac-

uum process for condensing milk with cane sugar to a semi-liquid form. In 1883 Horlick at Racine, Wis., discovered how to reduce milk to a dry powder form with extract of malted grains, without cane sugar.

This product HORLICK named Malted Milk. (Name since copied by others.) Its nutritive value, digestibility and case of preparation (by simply stirring in water) and the fact that it keeps in any climate, has proved of much value to mankind as an ideal food-drink from infancy to old age.
